Investment Strategy

Arabesque Systematic is a global, dynamically risk-managed fund that integrates sustainability analysis with a rules-based investment process. The fund's objective is to provide investors with risk-controlled exposure to equities by varying the equity/cash allocation each day.

The fund selects stocks from an eligible universe of c.3,000 global, publicly-listed companies that have been screened for liquidity and for their sustainability performance based on Arabesque S-Ray®'s UNGC and ESG scores.

The investment universe excludes companies that generate significant revenue from gambling, alcohol, tobacco, weapons and coal extraction.

The fund targets above-market returns over a full market cycle with mid- and long-term capital appreciation.

The portfolio consists of c.100 equally weighted stocks when fully invested.

Past performance of the Fund relative to any index should not be indicative of future performance relative to that index. The MSCI USA Index is designed to measure the performance of the large and mid cap segments of the US market. With 625 constituents, the index covers approximately 85% of the free float-adjusted market capitalization in the US. PERFORMANCE.
